

My name is Icó Tóth, I am from Hungary, I am the president of the Mallow Flower Foundation. I joined ENGAGe in 2017 and from the first time I enjoyed the knowledge, connections, cooperation with the members, with doctors. I felt that through ENGAGe we are able to do more for gynecological patients and also for HPV prevention.

In 2018 I was an invited member of the EEG, I started to know more about the work running at the background. In 2019 I applied to be an official member of the executive group, and I had the honor of taking over the co-chair position from Esra Urkmez, who established a powerful network.

In 2021 I finished my position, but as a past co-chair I had the chance to be in the EEG. I like to be involved in more work of ENGAGe, planning, keeping contact with the members, establish, achieve and listen. I feel that ENGAGe is a strong part of me and I really want to work closer in it. I would like to support EEG and the new members, the chairs. I think all the chairs and co-chairs feel the same I feel, that ENGAGe is like our baby, and we want to be part of it somehow.

We still have a lot to do for gynecological patients. Thank you if you give me an additional chance to be part of this again.
