

# WHAT HPV IS?

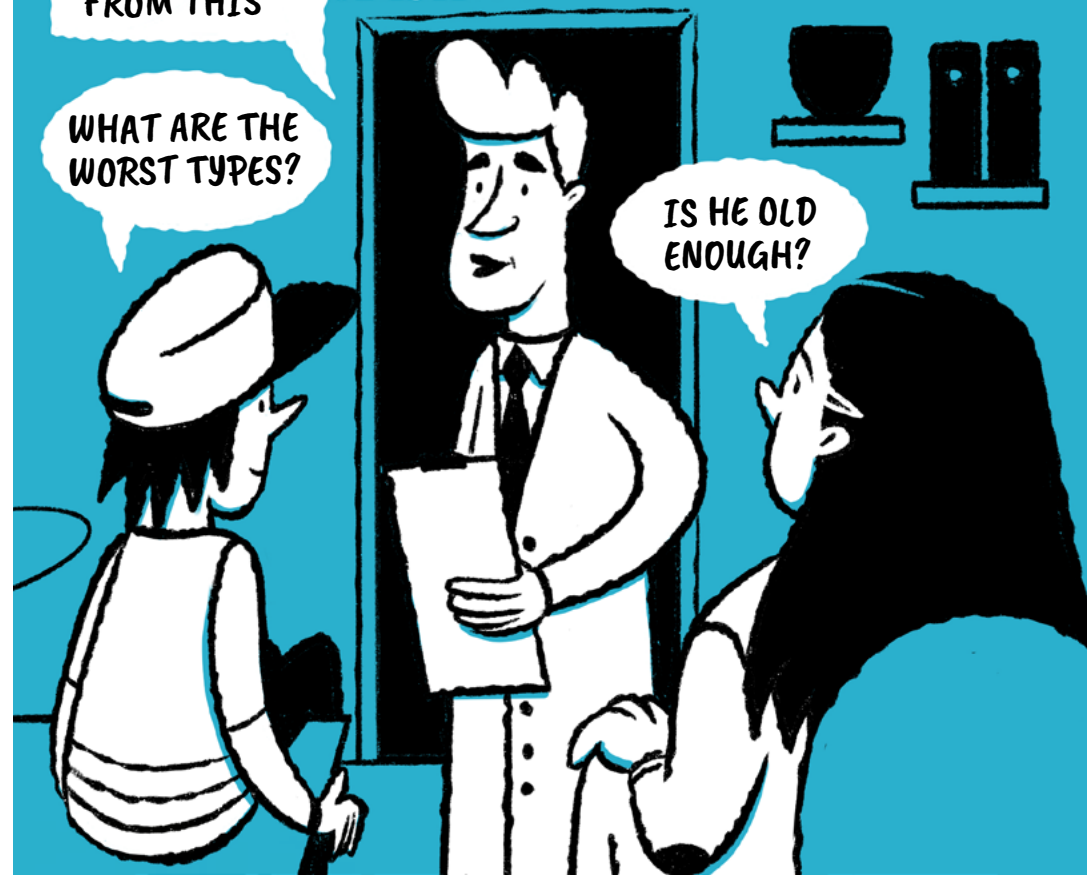

HPV IS THE HUMAN PAPILLOMAVIRUS, IT IS THE MOST COMMON SEXUALLY TRANSMITTED DISEASE. IT AFFECTS BOTH MALES AND FEMALES. THERE ARE ALSO MANY DIFFERENT TYPES OF HPV VIRUSES WITH VARYING SEVERITY. FORTUNATELY, THERE IS A VACCINE THAT PROTECTS YOU

HPV 16 AND 18, THEY ARE HIGH-RISK HPV STRAINS. HPV CAN BE AS BAD AS CANCER OR GENITAL WARTS, THERE IS A WIDE RANGE OF SEVERITY. THE HPV VACCINE PROTECTS YOU FROM THIS

WHAT ARE THE WORST TYPES?

IS HE OLD ENOUGH?

AT 13 YEARS OLD, HE IS IN THE RIGHT AGE FOR THE VACCINE. IT IS RECOMMENDED TO START AT 11 OR 12 YEARS OLD, BUT YOU CAN GET IT AS EARLY AS 9 AND THROUGH AGE 26.

CAN I GET HIM VACCINATED TODAY?"

HE CAN GET THE FIRST DOSE TODAY, THERE ARE TWO, YOU GET THE SECOND ONE AFTER 6-12 MONTHS

SEE YOU AFTER 6-12 MONTHS!

THANK YOU!
